

ClimateClever Business App

Join us today and start measuring and reducing your organisation's carbon footprint AND save money!

The **ClimateClever Initiative** is an innovative, data-driven, online platform that enables users to *measure, track* and *compare* their utility consumption and carbon footprint, reduce their emissions and utility costs, and increase their knowledge around climate change, sustainability and low carbon living.

In the lead up to ClimateClever's exciting new 'Business' Platform (launching this summer!), we are offering businesses who want to get started, the opportunity to come on board right now. Our team will calculate your businesses carbon footprint, help you set targets, and identify some actions to get you started. When the App launches, we'll seamlessly transition the data over for you.

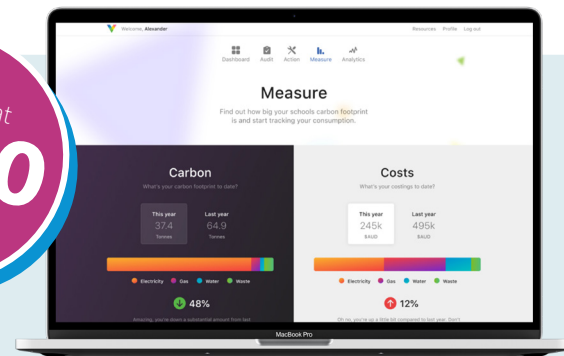

Join us today!

Benefits of the ClimateClever App*

- Access to a simple-to-use, engaging and tried-and-tested online platform;
- Ability to measure and track consumption, costs & carbon emissions throughout the year
- Access to tailored tips & evidence-based recommendations for actions to reduce your emissions;
- Ability to assign actions to individuals within your business, engaging your staff in the process;
- Ability to track your progress and the impact of your chosen actions
- Ability to purchase offsets;
- Become carbon neutral, using credible and certifiable methods;
- A meaningful way to engage your whole organisation;
- Opportunity to join a growing community of businesses taking action on climate change!

*ClimateClever will calculate your carbon footprint manually right now, and transition all your data over to the App when it launches, so you can hit the ground running!

Starting at
\$500
